Frequently Asked Questions How can I view, modify, or delete projects in Microsoft Project? You can view, modify, or delete projects in Microsoft Project using the basic interface. To do this, click on the Projects icon on the Task Bar, select the project, and right-click on it. The Properties dialog box will open. If you do not see the list of projects that are stored in your Microsoft Project, try: Using the Up and Down Arrow buttons: Navigate to the project that you wish to delete. Press the Delete button Repeat steps 2 and 3 to delete as many projects as you wish. Can I create, modify, or delete projects by using the mouse? Yes, you can also use the mouse to create, modify, or delete projects. Click on the Projects icon on the Task Bar and select the project that you wish to modify. Then, right-click on it. The Properties dialog

System Requirements:

By playing from the beginning, it's highly recommended you have at least a 3.0-gigabyte (GB) graphics card and at least a 1.8-GB RAM. Although the graphics card you are using in this game is not a requirement, but if you are planning to join a game on LAN with a compatible display, then a very high-end graphics card is a must for you. With the above requirements, a good video game playing experience should be available. Even though
